Objective

Aspiring software developer passionate about building scalable applications and solving complex problems. Seeking an opportunity to contribute and grow in a dynamic environment.

Technical Skills

• Languages: Java, Python, JavaScript, C, C++
• Frameworks & Tools: Git, C#
• Databases: MySQL
• Python Libraries: NumPy, pandas, matplotlib, Seaborn
• Other: REST APIs, Data Structures & Algorithms (DSA)

Projects

1. Job Portal Web Application (Django, Python, AI)
  - Built a full-stack job portal where users can post and apply for jobs.
  - Created a resume builder for candidates.
  - Added AI chatbot assistance for career guidance.
  - Features: job posting, job application tracking, automated resume generation, user authentication.

2. Hyper Rider, High-Speed Racing Game (C#, Unity, MySQL)
  - I designed and built a 3D racing game that allows track customization and features an infinite obstacle mode.
  - I implemented dynamic obstacles, skill upgrades, and customizable race paths.
  - I optimized game mechanics for smooth performance and an engaging user experience.

3. Netflix UI Clone – A responsive front-end replica of Netflix.
  - Tech Stack: HTML, CSS, JavaScript
  - Designed a pixel-perfect, responsive UI and implemented interactive elements.

Education

B.E. in Civil Engineering | [RTMNU] | 2022

Certifications

• C Programming Certificate
• C++ Programming Certificate
• Python Developer Certificate

Achievements

• Solved 50+ LeetCode problems (updating count regularly)
